

Final Year Project 2026-27

Cheuk Ting Li

ctli@ie.cuhk.edu.hk

CTL1 – Smart Note-Taking Software

- Design an app that allows users to take notes on a touch screen device
 - Smart phone or tablet
- Automatically organize notes according to time and/or topic
- Generate summaries of notes
- Allow multiple users to collaborate
- Theory: Handwriting recognition, machine learning, large language models, etc.
- Practice: Develop a mobile app/web app for note taking

CTL2 – Smart Time Management Software

- Design an app for managing tasks, events and meetings in a personal calendar
- Schedule tasks in an optimized manner
- Coordinate (large and small scale) meetings between participants
- Challenges:
 - Managing time conflicts
 - Schedule meetings between users while protecting privacy
- Theory: Differential privacy, graph algorithms, etc.
- Practice: Develop a mobile app/web app for managing events and meetings

Su	Mo	Tu	We	Th	Fr	Sa
27	28	1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30	31	1	2

CTL3 – Smart Recommender System

- Design an app that gives useful recommendations to users
 - E.g., restaurant, shop, movie recommendation
- Challenges:
 - Accurate recommendations
 - Requires minimal amount of information from the users
- Theory: Collaborative filtering, differential privacy, etc.
- Practice: Develop a mobile app/web app for the recommender system

CTL4 – Self-proposed Project

- Research on information theory, communications, privacy, etc.
- Visit <https://www.ie.cuhk.edu.hk/people/ctli.shtml> for my research interest
- Let me know (ctli@ie.cuhk.edu.hk) if you are interested
