Office: SHB 807

Project code :	CTL1
Project title :	Smart Note-Taking Software
No. of students :	1-2
Description of project :	The goal of this project is to build a note-taking application that allows the users to take notes on a touch screen device (smart phone or tablet). The app should automatically organize the notes and provide useful information such as summaries. Optionally, the app may allow multiple users to collaborate. Students may choose to build a mobile app or a web app.
Industrial collaboration :	No.

Project code :	CTL2
Project title :	Smart Time Management Software
No. of students :	1-2
Description of project :	The goal of this project is to build an application that allows the users to manage tasks, events and meetings in a calendar. The application should help the user increase productivity by scheduling tasks in an optimized manner. Students may choose to build a mobile app or a web app.
Industrial collaboration :	No.

Project code :	CTL3
Project title :	Smart Recommender System
No. of students :	1-2
Description of project :	The goal of this project is to build a recommender system that can provide useful recommendations via machine learning, preferably with limited information from the users in order to preserve privacy. Students can decide on the category of products recommended (shops, books, movies, etc.), and the platform of the app (mobile or web app).
Industrial collaboration :	No.

Project code :	CTL4
Project title :	Self-Proposed Project
No. of students :	1-2
Description of project :	This project is for students interested in research on topics in information theory, communications, privacy, etc. Please contact me if you are interested.
Industrial collaboration :	No.
