Office: SHB 734A

Project code :	PKM1
Project title :	Application Powered by Anonymous Credential
No. of students :	1
Description of project :	With increasing popularity in password-less authentication, students participating this project will explore the protocols and apply anonymous/verifiable credential (with <i>anonymous</i> revocation) to further enhance user privacy while maintaining authenticity and accountability. The deliverable will be an application with privacy focused authentication mechanism.
Industrial collaboration :	No.

Project code :	PKM2
Project title :	AI-powered Service/Application
No. of students :	1-2
Description of project :	The project aims to build an AI-powered application that further improves user experience in existing applications. Students may focus on a topic of their choices and build a novel application.
Industrial collaboration :	No

Project code :	PKM3
Project title :	Self-Proposed Topics
No. of students :	1-2
Description of project :	Students may propose any topic, preferably on applied cryptography. Students are expected to self-learn and explore applied cryptography to produce results that have real-world usage/impact.
Industrial collaboration :	No.
