

General Remarks

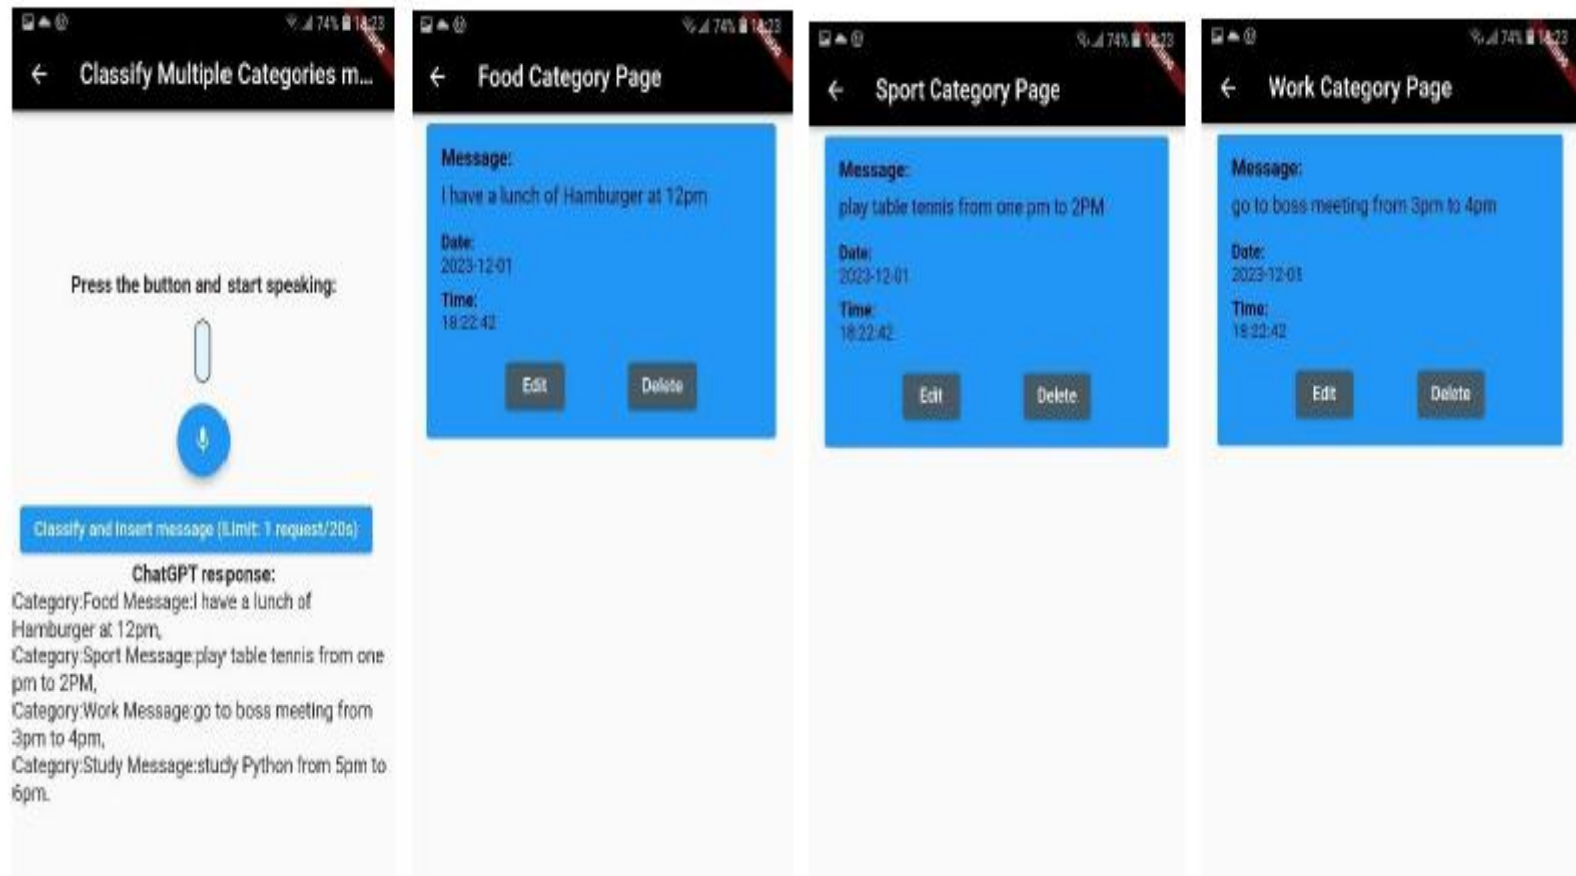

- Total quota: at most 4 students
- You are most WELCOME to propose your topics.
(They don't even have to be related to what I've proposed.)
- Your topic will be considered *as long as you know what you want to do and you can do it.*
- Feel free to modify my topics to suit your interests.

TML1: Innovative Apps on Smart Phones

- 1 - 2 students
- Different technologies are ready for you to employ: LLM, speech recognition, OCR, text-to-speech, 3D, AR, ...
- Develop an innovative application on smart phones using some of these technologies.
- It can be for business, for education, or any other purposes. It can be the apps you wish you can find.
- You need to propose and define the details of the project.

Personal assistant

Interior design

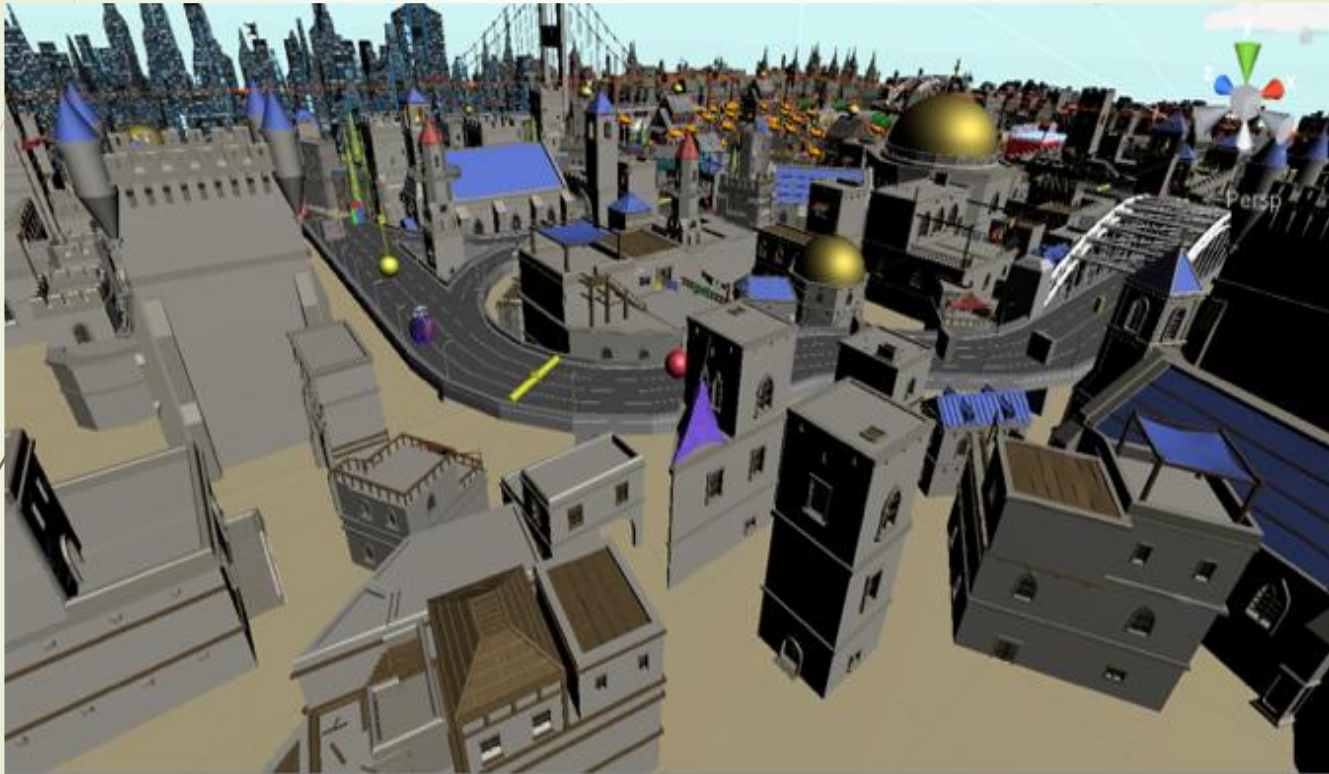

TML2: Game on Smart Phones

- 1- 2 students
- Develop a new game on smart phones.
- The game may help achieve some certain purpose, e.g. to attract people's attention to a topic, to connect people together, etc., while providing entertainment
- Action? Strategy?
- Multiplayer? 3D? AR?
- The game may also incorporate player-specific elements.
- You need to propose and define the details of the project.

Racing game

Escape game

Building game with environmental awareness
